TOYO NanoEnergy 3: Enjoy efficiency without sacrificing safety or comfort.

NanoEnergy 3 is the latest addition to the highly advanced NanoEnergy range of tires. The NanoEnergy name signifies tires with environmentally friendly production and performance which maintain high levels of safety, comfort and mileage.

The third model in the NanoEnergy family benefits from improved construction materials including innovative new polymers in the tread compound. These new materials, along with other design technologies incorporated in the NanoEnergy 3, offer longer tire life, better wet performance and lower fuel consumption than the TOYO 350.

NanoEnergy 3, the result of TOYO TIRES Nano Balance Technology, is for drivers of compact and mid-range cars looking for a fuel efficient and safe tire.

13 - 15 inch. Speed indices H and T.

Tread Pattern Features

- 1 RIB TYPE PATTERN**
Low rolling resistance.
Improved wet and dry braking.
Longer wear life.
- 2 3D MULTI-WAVE SIPES**
Reduced pattern noise.
Prevention of irregular wear.
- 3 WIDE STRAIGHT GROOVES WITH SILENT WALL**
Excellent resistance to aquaplaning.
Reduced noise emission.
